

YOUR GARDEN  
LIGHTING SPECIALISTS

**ESTABLISHED FOR OVER A DECADE, KG ELECTRICAL CONTRACTORS HAVE GROWN IN SIZE AND STATURE TO THE INNOVATIVE ELECTRICAL CONTRACTING COMPANY YOU SEE TODAY.**

Whilst we install all types of electrical work, our passion and niche is within domestic and commercial external lighting and power installations - the team work to illuminate and power the nations gardens.

Striving to make landscapers and designers projects look even more impressive, our team offer design and consultancy services as well straight forward installation.

Effectively and efficiently, plans are made to install within all shapes and sizes of landscapes, from your modest townhouse garden to large manor houses through to vast commercial spaces.

Having worked at some of London's most prestigious locations and worked with various well-known landscapers and designers, many of our projects have won awards with SGD, BALI and APL.

You'll find our work displayed at Sopwell House Hotel in St Albans, RHS Wisley in Surrey and various private gardens throughout London and the home counties.

*... Having the knowledge on the practicalities of lighting and power installation, I have been offering advice and consultancy to some of most well-known names in the industry, as a trusted partner my expertise is called upon for upcoming projects.*

*I am fortunate enough to have a fantastic team who share my passion and vision and are able to execute the installation work with perfection!...*

**Kyle Gamble  
Owner**

## RHS WISLEY

### HILLTOP GARDEN, WORLD FOOD GARDEN, WILDLIFE GARDEN

- Landscaper Landform Consultants
- Designer Ann Marie Powell
- Lights DW Windsor, Collingwood

This project involved power supplies for water features and pumps, recessed in ground sockets throughout the gardens, Power poles for catering equipment during shows and events.

There were large power supplies to route through the gardens for secondary distribution boards too.

The post lights in the Hilltop garden that are bespoke made by DW Windsor for this project. The twin spike lights under the pergolas in the World Food garden are manufactured by Collingwood.

## MARSHALSWICK LANE | ST ALBANS

Designer Kyle Gamble | Lights Collingwood, Elipta

The project at Marshalswick Lane shows the transformational effect that lighting can have in a garden.

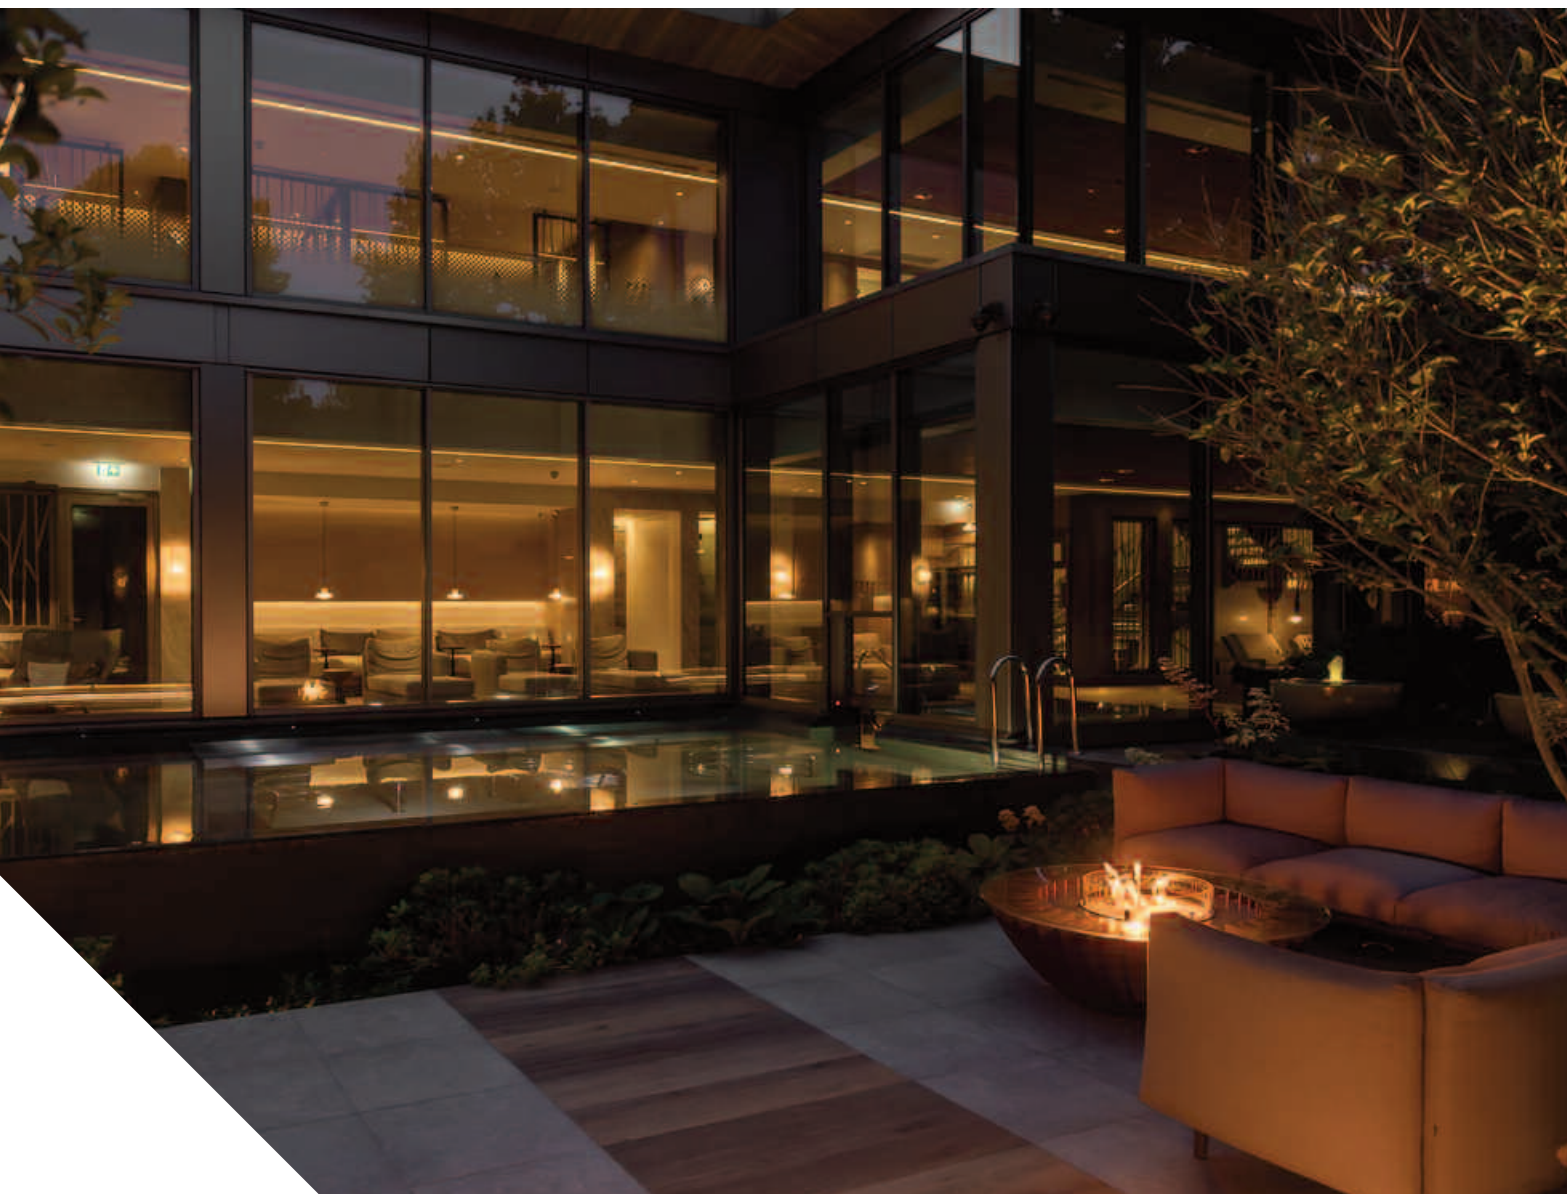

The client called us because they wanted to be able to enjoy their garden later in the evenings during the summer months.

All lighting has been installed into their existing garden, patio and decking.

We managed to hide all cables and only had minimal disruption to the existing garden.

We installed spike lights in the plant beds, bollard lights on the patio by the stairs and recessed marker lights into the decking.

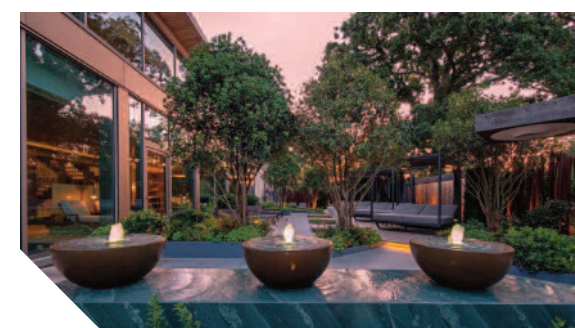

## COTTONMILL SPA | ST ALBANS

### SOPWELL HOUSE HOTEL

- | **Landscaper** Landform Consultants
- | **Designer** Ann Marie Powell
- | **Lights** Hunza and LuxR

Completed towards the end of 2019 – this was our first big commercial project with Landform Consultants – We have since done many more.

The project involved 6 lighting zones.

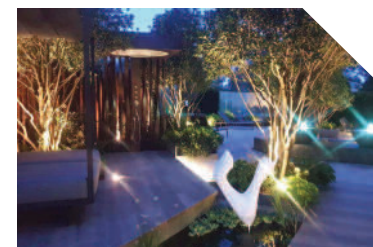

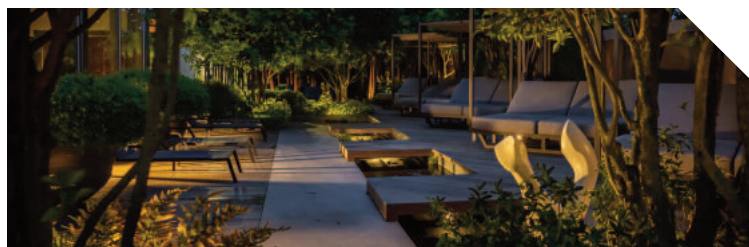

Various power supplies for showers, hot tubs, pumps, controls and sockets.

Data cabling for internet, signal cables and speakers.

The lighting installed was a mixture of recessed lighting in the paths and steps, spike lights in the foliage and lights mounted in the pond.

The whole project ran smoothly with KG even spotting a potential issue and implementing a solution before it became an issue.

We have since gone on to become the resident electricians for Sopwell house completing all of their internal and external maintenance and refurbishments – including repair work to other external lighting installations.

## CAMDEN STUDIOS | LONDON

**Landscaper** Norland Landscapes | **Designer** Urban Paradise | **Lights** Hunza

Completed in late 2021, this is a remarkable project then enables a tiny garden to look massive.

Given the small nature of the garden it created its own challenges of where to hide all the control gear and drivers to power our equipment.

We had to install external double socket outlets, power supplies for garden heaters along with recessed lights, spike lights and wall lights.

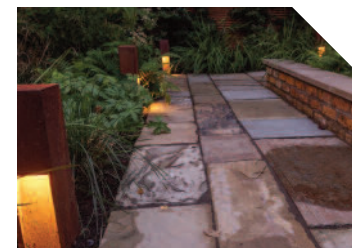

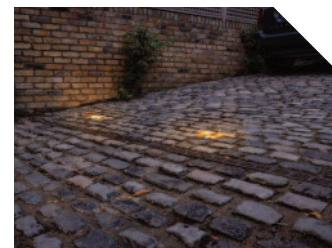

## NORTH GROVE | LONDON

**Landscaper** Belderbos Landscapes | **Designer** Nilufer Danis | **Lights** SLV, Hunza, LuxR

This was one of the first jobs that we completed for Belderbos Landscapes – We now regularly complete work for them throughout London.

This project involved recessed lighting in the front driveway.

In the rear garden it was a complete overhaul – new lighting along the pathway and a spike light under a tree at the bottom of the garden.

## JEROME DRIVE | ST ALBANS

**Designer** Kyle Gamble | **Lights** Collingwood

Completed in 2020, The garden lighting install was part of a full house refurbishment.

KG electrical completed all the electrics throughout the house and the gardens. Kyle was given free reign to design and install the lighting in the front driveway and the rear garden.

Power was required for the sunken fire pit, sunken hot tub, garden room and the shed.

Various types of lighting were installed for different purposes – ambience, safety and security.

## LETTY GREEN | EXCLUSIVE HERTFORDSHIRE VILLAGE

**Designer** Kyle Gamble | **Lights** Hunza, Collingwood

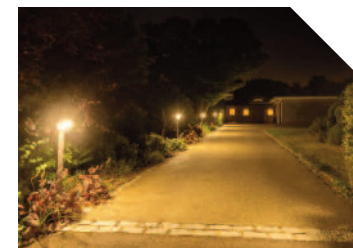

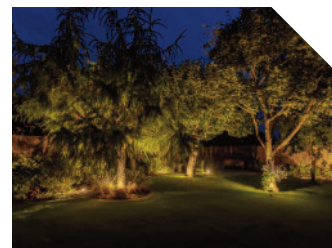

Completing this design and install project for a famous Paralympian has certainly been a memorable one. Originally called out as a rescue mission for a tripping circuit, we realised very quickly the existing install was completed to a poor standard and didn't take the client's needs into account.

After resolving the issue, we redesigned the installation placing fittings in easy access locations as well as using more suitable lights to bring his garden to life.

The system is now controlled by a timer as well as utilising motion sensors so the client can safely enjoy their outdoor space with minimal fuss.

Along the driveway we opted for bollard fittings, in the rear garden, wall lights have been installed on the patio, spike lights in the raised beds and high powered lights under the trees.

It's safe to say that the lights haven't tripped out since we visited!

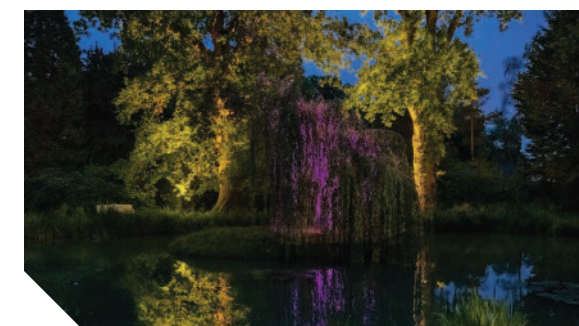

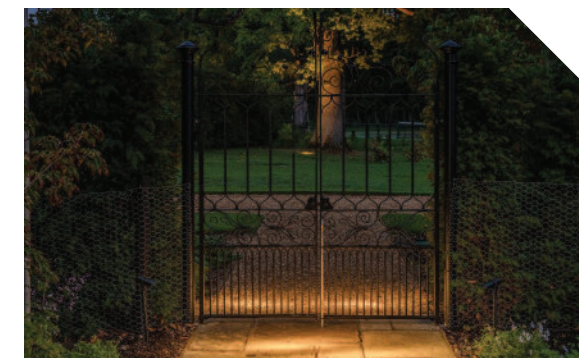

## CHESHAM MANOR HOUSE |

**Landscaper** Landform Consultants

**Designer** Taylor Tripp

**Lights** Collingwood, Hunza, LuxR

A first time working with the fantastic designers at Taylor Tripp and our third project in a row with Landform Consultants.

This project is our biggest one to date – it involves 35 external lighting circuits and 12 power circuits.

There are several distinct gardens throughout the wonderful acres of grounds including a pergola walk, formal terrace, sunken garden, working garden, open meadow, BBQ terrace and tennis courts.

Our work involved 265 lights throughout these gardens such as recessed lighting in the steps, pathway lighting along the various walkways, submersible lighting in the water feature, powerful ground lights to illuminate the 300 year old oak trees.

The power circuits supplied the entrance gates, sunken sockets, water features, shepherds hut, BBQ area and various outbuildings.

You can never doubt the dedication of our team – they even spent time learning how to control a rowing boat to get lights on the island in the pond!

## PARK AVENUE NORTH | HARPENDEN

**Landscaper** Owl Landscapes | **Designer** Breton Thomas | **Lights** Hunza, LuxR, Collingwood, Original BTC

The wonderful space in this grand manor house in Harpenden has been designed by Breton Thomas Studios.

This project is our 4th one for the team and had its own intricacies with an eccentric client added into the mix!

There are various areas to this garden including a pergola walk, kids play area, water feature, swimming pool and a BBQ area.

All areas required different types of lighting – Spike lights in the flower beds, Recessed LED strips by the pool, Marker lights on the steps, Wall lights by the changing rooms, Submersible lights in the water feature and some fantastic moon pendants hanging from the Pergola walk.

## GABRIEL SQUARE | ST ALBANS

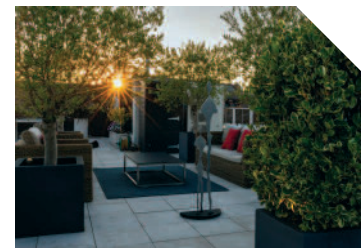

**Designer** Kyle Gamble | **Lights** All LED

The Penthouse suite at this prestigious new development in St Albans was only lit by the moonlight until the KG team arrived!

Working with the clients and their gardener we were able to turn this terrace into a lovely showpiece garden.

The subtle lighting accents the shape of the terrace and allows the parties on the terrace to last until the early hours.

There are wall lights with the cabling hidden behind screens, power recessed into the paving slabs and spike lights wired into the plant pots.
